PROFESSIONAL SUMMARY

Full Stack Developer experienced building **MERN** web applications, **REST APIs**, authentication, **RBAC**, and production debugging during a 4-month internship at Knovista Technologies. Delivers full-stack solutions that improve stability and performance, working primarily with JavaScript and Node.js.

SKILLS

Languages & Frontend: JavaScript (ES6+), **TypeScript**, **React**, **HTML5**, **CSS3**, **Bootstrap 5**, **EJS**, **Vite**

Backend & APIs: Node.js, Express.js, **REST API Design**, **Socket.io**, **WebRTC**

Databases & Caching: **MongoDB**, **Redis**

Authentication & Security: **JWT** (access/refresh token rotation), **RBAC**, **bcrypt**

DevOps & Tools: **Docker**, **Git/GitHub**, **Postman**

Integrations: **Razorpay**, **Cloudinary**, **Multer**, **Monaco Editor**

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Knovista Technologies Pvt. Ltd - *may 2026 – sep 2026* • Completed a **4-month internship** developing and maintaining **full-stack web applications** end to end, delivering production features and fixes on schedule.

- Built and shipped **REST APIs** and backend endpoints using **Node.js** to support core application features and integrations.
 - Integrated **database** and caching layers with **MongoDB** and **Redis** to support backend features and improve response performance.
 - Implemented **authentication** and role-based access control (**RBAC**) modules to secure resources and manage user permissions.
- Participated in code reviews and **collaborated** via **Git** and **GitHub** to maintain code readability, consistency, and shared ownership.

PROJECTS

NextMeet — Developer Interview & Video Conferencing Platform

[NextMeet Application](#)

- Built a real-time **meeting web application** for technical hiring with collaborative coding, interview evaluation workflow, and permission-based access control.
 - Implemented **WebRTC** 1-to-1 video calling, **Socket.io** real-time chat, and a **Monaco Editor** collaborative code editor.
- Designed secure authentication using short-lived **JWT** access tokens paired with **SHA-256-hashed**, rotating **refresh tokens**.
- Built the meeting lobby/pre-join flow with live camera/mic preview (`getUserMedia`), collision-safe unique meeting code generation, and **React Router-based state** handling.

Technologies: React, TypeScript, Node.js, Express, Socket.io, WebRTC, MongoDB, Monaco Editor, Vite

QuickKart — Full-Stack E-Commerce

Architected a **full-stack** e-commerce web application with authentication, product management, cart, orders, image upload, caching, and a scalable backend architecture focused on performance optimization.

- Converted static pages into dynamic **EJS** templates with server-rendered data and a consistent **Bootstrap 5** design system across storefront and admin panel.
- Integrated **Razorpay** payments, wallet, coupons, offers, and referral systems, with complete **API documentation** across all modules in **Postman**.
- Implemented **JWT authentication** in **httpOnly cookies** with separate user/admin roles, soft-delete for users, and blocked-user access control.

Technologies: MERN (MongoDB, Express.js, React, Node.js), Redis, Docker, Cloudinary, Multer, EJS, Bootstrap 5, Razorpay, JWT, Postman

EDUCATION

Full Stack Web Development Program, **MERN Stack**, Brototype *Jan 2025 – Sep-2026 · Kochi*

Wood and Paper Technology, Government Polytechnic College, Kannur *Aug 2020 – Mar 2023 · Kerala* +2, Commerce,
Government Higher Secondary School, Kuthuparamba *Jun 2017 – Mar 2019 · Kannur, Kerala*

LANGUAGE

English (fluent), Malayalam (native), Hindi (B2)
